Subject: Microsoft Settlement

I wish to oppose the Microsoft settlement in the strongest possible terms. Please recall what Microsoft did in response to previous, much clearer instructions. In the words of the DOJ itself, Microsoft offered "a version of Windows 95 that will not work." That contemptuous behavior on the part of Microsoft should not be forgotten. The proposed settlement is full of ambiguities and loopholes that will allow Microsoft ample opportunity to mock the courts, the Justice Department, and the American taxpayer. They will seize every opportunity.
